

***Improve safety, decrease costs with the Vari-Tuff™ Die Cart***  
3.10.09

Like all manufacturers looking to lean up processes and improve safety, Valley Craft is attempting to provide customers with cost-cutting, safety-driven options for handling materials by implementing lean strategies and ideas in their own environment.

Like many other manufacturers, for years Valley Craft has utilized forklift labor to load and unload 500-lb. dies on and off press brakes. But no longer. Heavy dies are now handled with Vari-Tuff™ brand Adjustable Die Carts, eliminating the safety hazard of forklift traffic and saving valuable production time.

The roller deck can be adjusted to match the height of the machine deck. Die stops keep the load secure during transport and storage. The main frame is constructed of 7-gauge steel, and is adjustable in height up to 10" in 1" increments. Unit rolls on (2) swivel & (2) rigid 6" phenolic casters, measures 31"W x 35"D x 29-39"H, and is available with optional floor lock. Vari-Tuff™ Adjustable Die Carts are also available with customizable features such as hydraulic lifting, battery-orated power drive system, and capacities up to 6,000 lbs.
